EXPERIENCE

SOFTWARE ENGINEER

• 2021 - Present

5MINS.AI

- Leading the internal adoption of generative AI tools, moving the team from manual processes to AI-augmented workflows.
- Internal AI Mentorship: Serving as the go-to subject matter expert, upskilling colleagues on prompt engineering, AI ethics, and tool-specific best practices.
- Bootstrapped the web version of the platform, which was crucial for the deployment of reporting and management tools, which increased retention significantly.
- Full-stack development for the company's main cross-platform app using React Native. Most features are also replicated in the web app (React.js) and backend with Node.js + GraphQL.

SOFTWARE ENGINEER

• 2020 - 2021

KUANTOKUSTA

Played mostly the role of backend developer. Worked with crawlers, microservices, REST API's, legacy monolithics.

Technologies used: Nest.js, PHP, React.js, Node.js, Redis, Docker, PM2, MySQL, PostgreSQL, MongoDB.

FREELANCING

• 2020 - 2021

ANAPINTOTERAPEUTA.PT

Web solution for a massage therapist consisting of the frontend website for clients to make appointments, generate custom vouchers, profile page with their history and a blog. A backoffice for the therapist to manage all aspects of her business and her website. And a REST API properly protected, with roles, to handle the requests from both applications. Technologies used: Next.js, React.js, Adonis.js, BullMQ, PostgreSQL.

EXPERIENCE (CONTINUED)

FREELANCING

• 2020 - 2020

MIGUELTRIGO.EU

Portfolio website for a lecturer, writer, and teacher. Developed the admin portal to manage the blog, testimonials, lectures, and lecture requests sent from the website, and the backend (API w/ translations) to support both the admin portal and the website. Technologies used: Laravel, Inertia.js (React.js), Redis, PostgreSQL.

SOFTWARE ENGINEER

• 2018 - 2020

HOSPITAL-ESCOLA UNIVERSIDADE FERNANDO PESSOA

I played many roles, including designer, dev-ops, frontend, backend, full-stack and mobile developer. Technologies used: Adobe XD, Laravel, jQuery, Golang, React Native, Websockets, NGINX, supervisor, cron.

FREELANCING

• 2016

FAPOCRIL.COM

Fully developed the company website from the design until the deployment, with a fully-featured back-office. Used OO PHP, jQuery and SEO practices.

INTERNSHIP - WEB DEVELOPER

• 2015

MOVEISTORE

Developed a website to redirect customers of a specific niche of furniture to the main company website. Worked with PHP, jQuery and applied SEO practices.
